Lead Garments are worn by healthcare professionals to protect them from the harmful effects of x-ray radiation during procedures requiring the use of x-ray and fluoroscopy. Lead aprons are usually worn in combination with other radiation protective products to provide complete protection from x-ray exposure.

APRONS

QUALITY. SERVICE. INTEGRITY.

Protech's aprons are proudly hand-stitched in the USA with one collective mission: perfection. Our light-weight designs and ergonomic styles are the result of decades of manufacturing experience. Seamless finishes, clean stitching, and elegant curves are what make our aprons best-in-industry.

Fulfilling our commitment to high quality, our Proguard Aprons are made in the USA from locally sourced materials whenever possible. Protech follows the strict guidelines of the ISO Quality Management System and is approved to sell in major markets throughout the world.

COMPLIANCE

Protech has expertly crafted radiation protective garments for over 20 years. Our extensive product knowledge incorporates high-quality control systems as well as comprehensive regulatory testing.

EN 61331-1:2014: (EU) Protective devices against Diagnostic Medical X-ray radiation. (Determination of attenuation properties of material)

EN 61331-3:2014: (EU) Protective devices against diagnostic medical X-radiation Part 3: Protective clothing, Eyewear and Protective Patient shields.

ASTM 2547-18: (USA) Standard test method for determining the attenuation properties in a primary x-ray beam of materials used against radiation.

2 YEAR WARRANTY

Protech's high quality garments ("Garments", aka PPE or Aprons) include; aprons, thyroid collars, gloves, dental aprons, reproductive aprons, and lead accessories. The Garments are warrantied to be free of defects in materials and workmanship to the original purchaser for 2 years.

Upon evaluation, Protech will either repair or replace the defective item or part without charge to the purchaser. This warranty is void when the product has been tampered with, when repairs or attempted repairs have been made by unauthorized persons, or when the item has been subject to misuse, abuse or damage in transit. No charges will be accepted or reimbursed for unauthorized parts, repairs or services.

APRON RETURNS, REPAIRS AND DISPOSAL

Please contact your local representative for return instructions. All returns, repairs, recoveries, or exchanges, regardless of reason, must be accompanied by an authorized RMA. Customer should make available the Purchase Order # or relevant sales information.

For disposals, You must dispose of lead garments by complying with local, state, federal and/or international regulations where applicable.

TAKING CARE OF YOUR APRON

It is important to establish a consistent, deep-cleaning schedule to mitigate the risk of pathogen transmission. Please clean the apron immediately **after each use**. You can clean most dirt and stains (blood, bodily fluids, barium contrast media) using room temperature water along with the following cleaning solutions: mild diluted soap, alcohol or ammonium-based wipes, and highly diluted Clorox hydrogen peroxide (not recommended for long term use as it results in degradation over time). To apply cleaning fluid, please use a cloth or wipe and always use room temperature water.

Please Note: If you're dealing with biohazardous materials, we recommend using an additional barrier (such as SMS gowns) to protect the apron.

Examples of Approved Cleaners

- PDI Sani-Cloth® AF3 Germicidal Disposable Wipes
- PDI Super Sani-Cloth® Germicidal Disposable Wipes
- CaviCide® wipes
- Alcohol and Ammonium based cleaners are strongly recommended
- Sodium Hypochlorite (bleach) cleaners, while acceptable, result in minor degradation over time

DO NOT

- Do not machine wash or dry your apron
- Do not use hot or warm water
- Do not iron or autoclave

STORAGE

When not in use, garments should be placed on a hanger or stored using Protech's apron storage equipment. Best places to store your apron: Valet racks, peg racks, apron hangers and closets. If a hanger is not available, lay flat on a surface. For transportation, garments should be carefully rolled up, not folded, and placed into a box or Protech duffle bag.

All of our apron storage options can be found at the end of the apron section.

Please do not fold the aprons for an extended period of time as this will increase the chances of the inner material creasing or cracking. Also, avoid contact with sharp objects since they may damage the garment's protective core material. Keep garment out of direct sunlight or prolonged exposure to high heat. Store at 70-80°F (21-27°C). Temperature limits approximately 60-100°F (16-38°C).

AVA's enterprise level technology can save you time and money by helping you effectively manage your inventory and annual inspections. For more information, refer to our AVA brochure or avacloud.com.

APRON ORDERING GUIDE

STEP 1:

CHOOSE YOUR APRON STYLE

We offer two types of aprons: Frontal and Full Protection.

As their names suggest, a Frontal apron only protects the front of your body, while a Full Protection apron offers both front, lateral, and back protection.

For a **lighter weight apron**, choose a Frontal style. Our most popular frontal apron is the Flexback apron but you can view all of our styles beginning on page 35.

For **greater protection**, choose a Full Protection apron. We recommend the Proguard Balance Vest and Skirt, which offers a balance of protection and comfort.

Other important factors that should be considered in choosing your apron style: procedure type, duration, body type and personal needs.

FRONTAL APRONS

Frontal aprons only have protection in the front but are far more forgiving than full protection aprons. They contain less protective material, so they tend to be **lighter and more flexible** than full protection aprons. They are a fantastic option for **short procedures where risk of lateral exposure is low** or when a garment is required but you are not nearby the beam (over 6 feet or in another room).. If you're looking for a reliable, lightweight frontal apron we **recommend the Flexback** style as a clear customer favorite.

WRAPAROUND APRONS

Our Wraparound full protection apron styles provide **maximum protection** from the front to the back and are **excellent for long procedures with high exposure**. They do contain more protective material and tend to be **heavier than frontal aprons**. Compared to other full protection styles (Vest Skirts), Wraparounds are usually **easier to don but do concentrate weight on the shoulders**. As a full protection apron, a **proper fit is crucial** for weight distribution and comfort. We offer a wide variety of customizations and add-ons to make your wraparound apron fit perfectly.

VEST SKIRT APRONS

Vest Skirt Aprons are best suited for those wanting **maximum protection during prolonged procedures with lateral/back exposure**. While they contain more protective material due to overlapping between the vest and skirt, they **eliminate up to 50% of the weight burden on the shoulders and provide more maneuverability**. Our wide variety of Vest styles can be tailored according to your needs and are optimized to reduce weight by up to 15%. A **proper fit is critical** to ensure optimum protection, comfort, and longevity. Check out our customizations and add-ons to build your perfect apron.

STEP 2:

CHOOSE YOUR CORE MATERIAL & THICKNESS

Each core material varies in composition, weight and level of protection. Higher core material thicknesses result in more protection but also increase weight. The protection thickness of your garment, expressed as lead equivalence (LE), should be determined by your duration of exposure to x-ray and the intensity of the beam. The most critical factor is duration. For short, simple procedures utilizing lower kV beam intensities, 0.35mm LE may be suitable. Whereas 0.50mm LE should be used during long procedures regardless of beam intensity.

Protech's thickness options are 0.25, 0.35, and 0.50mm LE with .50mm* and .35mm* LE being the most popular. We offer additional options upon request such as .75mm and 1.00mm. **Standard protection for lead garments is 0.50mm in the front and 0.25mm in the back.** For other product types such as dental aprons and some lead accessories, standard lead equivalences may vary.

STEP 3: CHOOSE YOUR FABRIC COLORS

You will need to choose colors for the exterior, interior and binding thread of your apron. Need a fabric that performs? Consider our anti-microbial, Satinguard fabrics for an easy-to-clean option. You can view our fabric color options on pages 73-79.

If you have your own fabric that you'd like to use, we can accommodate! Just take a look at this Louis Vuitton apron; a special request by one of our customers.

4

STEP 4: CHOOSE CUSTOMIZATIONS

Depending on your apron style, you'll have a variety of customization options to choose from. Some examples: Embroidery, axillary wings, logos, extra pockets, etc.

CORE MATERIALS

Knowing what's inside your apron is as important as how that apron claims to protect you. So here comes the boring (but oh so necessary) part.

Diagnostic imaging exposes personnel most prominently to x-ray energy in the 50 – 150kV range. Each metal used in your product to block x-ray provides specialized protection at certain kVs. Lead (Pb) has become the industry standard for radiation protection because it efficiently protects across the entire kV range (50kV – 150kV). The catch? It's heavy and toxic to the environment. Other common metals used for radiation protection are: Antimony, Barium, Cerium, Tungsten and Bismuth. The problem is, they protect at specific ranges. Antimony (Sb) and barium (Ba) provide more efficient attenuation of the photon spectrum below the K-edge window of lead (35 – 90kV), while higher Z elements like tungsten (W) and bismuth (Bi) are more efficient for stopping higher energy radiation (>90 kV).

Each Proguard core material is carefully formulated to more efficiently attenuate portions of the photon spectrum and limit “gaps” in protection due to over-reliance on individual x-ray protective elements. Protech utilizes proper elemental balance to address k-edge concerns for key diagnostic imaging ranges. Protech's advanced elastomers exhibit the best balance of toughness, flexibility, durability and cracking resistance.

Protech makes every effort to accurately record its apron weights. Because each category is averaged, the numbers we provide in the weight chart are subject to a +/- 15% weight variance. Minor length or width adjustments, including heavier fabrics, are not differentiated and instead, averaged together. Please consider this when referencing the weight chart. Weights are measured using a 0.50mm LE core material thickness.

Protech specializes in tailor-made aprons. You can choose from over 150 colors for your apron's exterior color, interior color, and binding. When you're finished, you can add embroidery, logos and other add-ons for a truly customized experience.

Hand-crafted and made with patented polymer technology, our Proguard Aprons are more light-weight, flexible and durable than the competition.

PROGUARD

PROGUARD

PROUDLY MADE IN THE USA

With full time quality control staff and ISO certification, you are getting the best in American made protective apparel.

IN-HOUSE EMBROIDERY & LOGOS

Don't let your apron "disappear." Our embroidery and logos are done in-house with modern monogram machines and the latest in digitization technology.

ULTRA-FLEXIBLE CORE MATERIALS

Proguard's Core materials feature more flexibility and durability which provides superior, long lasting comfort.

CUSTOM APRONS MADE TO MEASURE

Proguard aprons are made to order. More importantly, they can be highly customized according to size and various ergonomic needs by our highly trained staff.

CUSTOMIZATION OPTIONS

BACK STRAP

A Velcro backstrap keeps your apron shoulders secured and prevents slippage.

ELASTIC BACK

Provides enhanced adjustability and lumbar support by shifting apron weight from shoulders to the hips.

BACK MESH

Allows for maximum airflow in the back panels of your frontal apron and helps keep you cool.

NON-SLIP FABRIC

A high friction, anti-slip fabric that is added to the back interior of your skirt or other key areas depending on style selection which reduces slippage and improves fit.

CUSTOMIZATIONS: COMFORT OPTIONS

When it comes to designing your perfect custom apron, Protech is #1. Our great selection of apron add-ons can increase your protection and improve comfort. **We offer 3 types of apron customizations: Comfort, Protection and Design addons.** Each customization is clearly defined to ensure you make the right choices for yourself.

APRON SUSPENDERS

Need a little extra help holding up your skirt? Try our apron suspenders to keep that apron skirt right where you want it.

SURGICAL DROP SHOULDERS

Specialty velcro tabs can be added to different apron styles allowing for easy removal of your apron to maintain sterile field.

CUSTOMIZATIONS: DESIGN OPTIONS

LOGO AND EMBROIDERY

Personalize your apron by placing your name or logo anywhere! We also have stock logos to choose from. Common locations include the pocket, just above the pocket, and on your thyroid.

VELCRO PATCH

A velcro patch with custom embroidery can be added to a specific area on your apron. Typical locations are on the pocket, above pocket, or to the left of your pocket.

LUXRAY PATTERNS

Have your apron tailored to perfection with LuxRay's patterned accents on the apron sides, pocket and thyroid collar. If you have a special fabric you'd like to use, we can incorporate that as well!

EXTRA POCKETS

Need an extra pocket or two? Whether you need one on your skirt, inside your vest or even on your knees (yes, we did it), we can accommodate most requests. Shown here is a spacious L-shaped pocket which can be added to your skirt.

CUSTOMIZATIONS: PROTECTION OPTIONS

AXILLARY WINGS

Axillary wings are a protective flap sewn-in or “snapped-on” to your apron and offer vital protection to vulnerable breast tissue and red bone marrow areas. Protection levels will match your apron specifications.

SIDE EXTENSIONS

Side Extensions can provide an additional +2 inches of protection on both sides and provide important lateral protection. Protection levels will match your apron specifications.

APRON SLEEVE

Apron sleeves wrap around your entire arm and offer comprehensive protection of vulnerable breast tissue and red bone marrow areas. Sleeves come standard in 0.25mm LE and can be sewn-in permanently or offered in our removable “Snap-on” option.

Note: To improve mobility, our apron sleeves are not sewn/attached at the armpit. For an upcharge, we can add a small “flap” which is tucked inside the apron armpit to ensure there are no gaps in protection.

APRON INSPIRATION

CUSTOM PROJECTS

LOUIS VUITTON MALE FLEXBACK APRON

One of our favorite custom apron projects was this LuxRay Flexback featuring Louis Vuitton accents. Custom from top to bottom, this apron boasted an attached thyroid collar and velcro-adjustable apron sleeve also made in the Louis Vuitton fabric.

LOUIS VUITTON FEMALE FLEXBACK APRON

Not to be outdone, we had another request for an exquisite Louis Vuitton apron.

If you have a special fabric you want to use, send it our way! Our team loves a challenge.

SWISS SOCCER CLUB SKIRT

This Swiss soccer club apron required great attention to detail to complete. The customer provided a special team flag to be utilized as the actual apron fabric.

THE DAWN OF JUSTICE APRONS

After custom flags and Louis Vuitton it was necessary that we honor the age of super heroes with our Special Edition DC Comics series. We hope Marvel and Avatar themes are next!

WRAPAROUND FLEXBACK MATERNITY APRON

MODEL: [AP-WAFBMA]

The Wraparound Flexback Maternity apron combines the best qualities of our flexback apron with the full protection and back support of our wraparound back relief apron. The elastic stretch-back shifts weight from your shoulders to your hips while the tri-tab velcro closure system provides convenient, easy-on easy-off wearability. In addition, the 6" wide frontal velcro allows the wearer to adjust the crossties up or down to account for mom's growing belly. The Wrap Around Flexback eliminates excess overlapping lead and is up to **15% lighter than traditional wrap styles.**

Please note: For extra safety, Maternity Wraparound Flexback back panels come standard 0.25mm LE in each panel, creating enhanced 0.50mm LE protection at overlap.

MODEL: [AP-TVEST]_(vest only) [AP-SKIRT]_(skirt only) [AP-TVS]_(vest and skirt combo)

With an easy-on, easy-off multi tab (velcro) closure design, the Tri-tab is a popular style for vest and skirt combinations. Velcro closures are located on the left shoulder and around the hips. An elastic back allows for a flexible fit while providing premium comfort and back support. The Tri-tab Vest Skirt reduces excess overlapping lead and is **up to 10% lighter than traditional vest models**. **IMPORTANT: For the most accurate fit, please use the "Tri-tab Vest" measurements to determine your proper size.**

Please note: Tri-tab Vest back panels come standard 0.125mm LE in each panel, creating 0.25mm LE protection at overlap. If greater protection is required, please specify.

LEAD CONFIGURATION FOR PROGUARD

VS

ESSENTIAL

0.50MM LE LEAD CONFIGURATION EXAMPLE

- 3/4 Overlapping Panel
- Desired protection at overlap where most sensitive organs are
 - helps with weight reduction
- Standard 0.25mm LE in back of skirt
- Standard Sizing Only

Dark gray areas indicate where vest panels overlap to create desired protection. In this example, two 0.25mm vest panels overlap to create 0.50mm LE protection over the body's most sensitive organs. White areas indicate 0.25mm protection.

LEAD CONFIGURATION FOR PROGUARD

BALANCE

0.35MM LE LEAD CONFIGURATION EXAMPLE

- Standard Overlapping Panel
- Seam-to-seam, single LE protection
- Standard 0.25mm LE in back (vest, skirt and wraparound)
- Custom and Standard Sizing available

Dark gray areas indicate where panel(s) are placed to create desired protection. In this example, there is uniform 0.35mm LE protection from seam to seam (no protection changes at overlap). This is achieved through the use of additional, internal layers of lead. White areas indicate 0.25mm protection.

ESSENTIAL™ WRAPAROUND BACK RELIEF APRON

MODEL: [AP-WAQ]

Offering full protection, this back relieving design transfers the weight from your shoulders to your hips with the aid of a 6" lumbar support belt. The Wrap Around Back Relief apron features velcro and buckle closures to ensure a proper fit. The Essential apron configuration **features extended front panels to achieve a 3/4 overlap (where protection is doubled) which allows for a lighter weight apron without compromising protection. The Essential Wraparound is available in standard sizing only.** For a made-to-measure Wraparound apron, see the Balance Wraparound on the next page.

APRON STORAGE

EXTEND THE LIFE OF YOUR APRON

When not in use, garments should be placed on a hanger or stored using Protech's apron storage equipment. Avoid contact with hot surfaces or exposure to direct sunlight. Also avoid contact with sharp objects, as these may damage the garment's protective core material. For transportation, garments should be carefully rolled up, not folded, and placed into a box or Protech duffle bag.

APRON DUFFLE BAG

MODEL: [AS-DUFFLE]

CAPACITY: UP TO 2 APRONS

Our duffle bag protects your aprons while traveling between facilities or out of the country. Protect and store your aprons for transport now with our affordable, high quality duffle bag. Features: 10" Velcro Opening, Carrying Handle & Shoulder Strap.

For all color options, refer to pages 73-79.

APRON HANGER

MODEL: [AS-HANGER]

CAPACITY: 40LBS

Constructed out of aluminum for durability and longevity this apron hanger is used for the storage of radiation protection aprons. It features hook style ends that are designed to hold lead skirts.

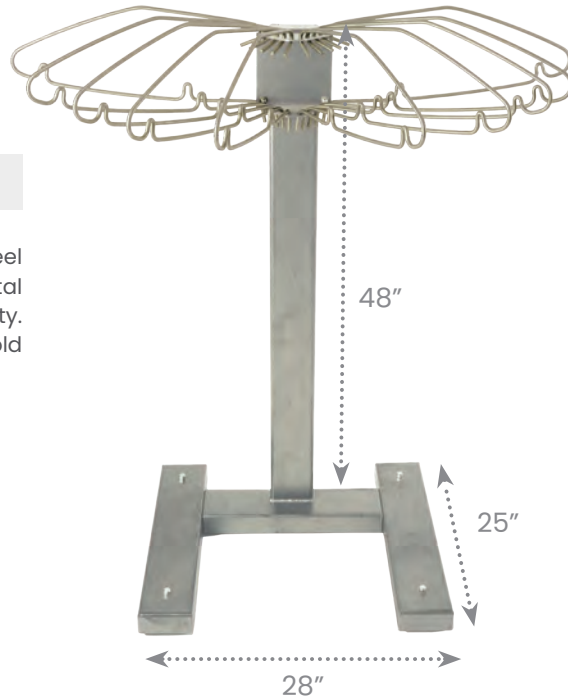

MIGHTY MAX RACK

MODEL: [AS-MAX-MOB]

CAPACITY: 10 APRONS

The Mighty-Max mobile apron rack's solid steel design holds up to 10 aprons. The pedestal base has rolling wheels for easy portability. Convenience hooks on each hanger can hold lead skirts.

PORTA RACK

MODEL: [AS-PORTRK]

CAPACITY: 8 APRONS

Ideal for use in the O.R., Specials, and Cath Labs, this portable apron storage unit is great quality and affordable. The 24" wheel base with double casters allows this completely loaded rack to glide smoothly while being moved. The porta rack features moving hanger arms that swing forward and backwards for easy apron selection.

PEG RACK

MODEL: [AS-PEG]

CAPACITY: 1-10 APRONS

The apron Peg rack is made of steel construction and easily screws into wall studs. It can store up to 10 aprons but comes in a variety of sizes that accommodate a range of lead aprons. This affordable wall storage for aprons is essential to prolong the life of your protective aprons. *Mounting hardware is not included.

Example configuration shown: PEG-8

Model	# of Pegs	# of Aprons	Dimensions
PEG-2	2	1	5 x 3"
PEG-4	4	2	10 x 3"
PEG-6	6	3	15 x 3"
PEG-8	8	4	20 x 3"
PEG-10	10	5	25 x 3"
PEG-14	14	7	35 x 3"
PEG-18	18	9	45 x 3"
PEG-20	20	10	50 x 3"

2-TIER VALET RACK

MODEL: [AS-VALET2]

CAPACITY: UP TO 10 APRONS

Industrial quality steel construction and medical-grade casters makes the 2-tier apron racks an excellent portable storage option. The rack provides storage capacity for up to 10 aprons. *Includes 4 screws for quick assembly

VALET RACK

MODEL: [AS-VALET1]

CAPACITY: UP TO 15 APRONS

Industrial quality steel construction and easy roll casters make these mobile apron racks an excellent portable storage option. The rack provides storage capacity for up to 15 aprons. *Includes 4 screws for quick assembly

WALL RACK

MODEL: [AS-WALL-L/R]

CAPACITY: 5 APRONS PER CONSOLE

Prolong the life of your radiation protective garment with our apron wall rack console. Each console holds up to 5 protective aprons with the combined left and right consoles storing up to 10 aprons. The wall console features hooks on the top of the hangers for lead skirts. *Does not include mounting hardware.

WIRE STORAGE LOCKER

MODEL: [AS-WLOCK3624]

CAPACITY: UP TO 15 APRONS

The Wire Storage Locker allows you to keep your garments and other valuables secure with the option of easy transport throughout your facility. The locker features lockable doors (opens a full 270°), 2 Wire Shelves, and a hanging rod (not shown) to easily hang your radiation apparel. The locker is coated with a true powder-epoxy over zinc-chromate electro-plating, ensuring a strong, durable finish with excellent handling of extreme temperatures and moisture. NEXGard®, an anti-microbial agent protects the epoxy coating from bacteria, mold, and mildew that causes odors and product degradation. Handles all environmental conditions. Some assembly required.

Z-RACK

MODEL: [AS-VALET3]

CAPACITY: UP TO 20 APRONS

Our Z-Rack is made with heavy duty construction and can hold up to 500 pounds. Large, swivel casters (2 with locking mechanisms) and convenient, nesting design make the Z-rack an excellent portable storage option. The rack provides storage capacity for up to 20 aprons!

APRON MEASUREMENTS

THE PERFECT FITTING APRON

Having a well-fitted apron is critical for comfort, optimized protection and garment longevity. An apron that's too big will leave you with gaps in protection. An apron that's too small will leave you uncomfortable and restrict movements during procedures. With that in mind, be sure to take a good look at our measuring instructions and size charts to determine your optimal size!

While most people can fit into a standard size apron, some will need a custom fit due to their unique proportions. For those looking for a tailor-fitted apron, Protech pride's itself on making some of the best in the industry.

Please review the following apron size charts and measuring guides. Once you've made all your measurements, you can contact us at 561.627.9769 or sales@protechmed.com. A representative will get back to you with more information.

Nervous about getting it right? Contact us! We have sales reps all around the world that can assist you.

CHEST MEASUREMENT

Measure around the largest circumference of the bust area, keeping the tape parallel to the floor with the client's arms at their sides.

WAIST MEASUREMENT

Measure around the smallest circumference of the torso. If you measure at waist level it may be inaccurate.

HIP MEASUREMENT

Measure around the largest circumference of the hips and buttocks with the tape parallel to the floor: generally 8-9 inches down from the waist.

FRONT APRON LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure in under the bust.

VEST LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure under the bust.

SKIRT LENGTH MEASUREMENT

Measure from the top of the pant line (waist) and over the outside of the hip down to the desired length.

APEX ADJUSTMENT

Measure from the top of the shoulder (towards the neck) over the bust to the nipple. The apex measurement determines whether adjustments need to be made to the shoulder area. This helps to avoid shoulder gapping or tight arm holes in your apron. For example, a male large height of 5'10" may be fitted into a 3X due to their measurements. This would likely result in excessive shoulder material. Therefore, an apex adjustment of -1" would be applied.

General Instructions

Standard sizes shown above apply as upper limits. If your measurements fall above a size's specified limit, we recommend you size up for additional allowance, aka "wiggle room." There is NO standard size allowance added so we recommend that you incorporate an additional 1-2" of "wiggle room" for the Chest measurement.

Length Adjustments

Length adjustments vary depending on your height and the required length adjustment to ensure your apron reaches around your knee cap. Any additional inches (up to 6") incur extra fees.
